ELSEVIER

Journal of Alloys and Compounds 262–263 (1997) 531–539

Journal of ALLOYS AND COMPOUNDS

Subject Index of Volumes 262–263

Activated conductivity
synthesis, thermodynamics and electrical properties of non-stoichiometric $Ba_2CuO_{3+\delta}$ 498
Ag_7NbS_6
crystal structures of low-temperature phases (Phase II) of ionic conductors Ag_7TaS_6 and Ag_7NbS_6 39
Ag_7TaS_6
crystal structures of low-temperature phases (Phase II) of ionic conductors Ag_7TaS_6 and Ag_7NbS_6 39
Al–Co–Ni
quasicrystals and related structures in Al–Ni–Co 350
Alkaline niobate
mixed valent niobium nitrides and oxynitrides resulting from ammonolysis of alkaline niobates 512
Alloys
the Sc–Ni system 258
Aluminosilicates
evidence of Eu^{3+}-O^{2-} associates by luminescence study of some silicates and aluminosilicates 450
Ammonolysis
mixed valent niobium nitrides and oxynitrides resulting from ammonolysis of alkaline niobates 512
an original way to prepare nitride-type compounds from sulfide precursors 410
Angular dependence
angular dependence of metamagnetic transitions in RNi_2B_2C (R = Er, Ho, Dy, and Tb) 169
Anisotropy
hydrogen insertion effects on the structural and the magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R = rare-earth metals) 194
Antiferromagnetic
magnetic structures of $HoRh_{2-x}Ru_xSi_2$ compounds 225
Antiferromagnetic materials
magnetic properties of the $UCo_{1-x}Ni_xAl$ system 471
Antiferromagnetism
neutron powder diffraction study of the antiferromagnetic compound $Tb_2Pd_{2.05}Sn_{0.95}$ 219
magnetic and electrical resistivity of RT_2X_2,RTX_2 and RTX intermetallic compounds 253
*R*NiAl hydrides and their magnetic properties 206
antiferromagnetic ordering in the novel Dy_3Ge_4 and $DyGe_{1.3}$ compounds studied by neutron diffraction and magnetic measurements 492
Applied magnetic field
angular dependence of metamagnetic transitions in RNi_2B_2C (R = Er, Ho, Dy, and Tb) 169

$Ba_2CuO_{3+\delta}$
synthesis, thermodynamics and electrical properties of non-stoichiometric $Ba_2CuO_{3+\delta}$ 498

Band structure calculations
magneto-elastic properties of $MnFeP_{1-x}As_x$ ($0.15 \leq x \leq 0.66$) and $MnRhP_{1-x}As_x$ isostructural series of compounds 508
Band structure
ferromagnetism of the chimney-ladder compound $Cr_{11}Ge_{19}$ 363
synthesis and characterization of copper intercalated $ZrTe_3$ 97
Bond valence
X-ray powder diffraction study of the stability of solid solutions in $LaO(Cl_{1-x}Br_x)$ 299
Borate
XAFS investigation of Cu(I) local environment in two types of glasses of base composition $LaMgB_5O_{10}$ and $LiLaP_4O_{12}$ 433
Borocarbides
quaternary borocarbides: the new and exciting magnetic superconductors 22
Bulk moduli
RuSi: metal-semiconductor transition by change of structure 238

Carrier doped (BiO)CuSe
electrical properties of layered copper oxyselenides (BiO)$Cu_{1-x}Se$ and $(Bi_{1-x}Sr_x)OCuSe$ 175
Cationic distribution
crystallochemistry and structural study of some nasicon-like phosphates 49
Ce-diluted layered oxides
mutual influence of '3d' and '4f' atoms in K_2NiF_4-type structure diluted solid solutions $Y_{1-x}Nd(Ce)_xCaCr_yAl_{1-y}O_4$ ($x \leq 0.1$; $y \leq 0.1$) 428
Cerium intermetallics
a unique metallic system $Ce_3Pt_{23}Ge_{11}$ 211
Chalcogenide cluster compounds
new experimental and theoretical studies on condensed molybdenum chalcogenide cluster compounds 311
Chemical bonding
electronic structure of AFe_2P_2, A = Ca,Sr,Ba[1] 516
Chemical potential
thermodynamic evaluation of phase equilibria in the quasibinary TiNi–TiRu system 263
Chevrel phases
superconducting and structural properties of rare-earth-based Chevrel-phase selenides $REMo_6Se_8$: first single crystal studies 406
new superconducting materials based upon doping of the Chevrel-phase binary compound Mo_6Se_8 331
in situ pulsed laser deposited thin films of ternary molybdenum cluster sulfides $Cu_xMo_6S_8$ ($2 \leq x \leq 4$) 54

Elsevier Science S.A.
PII S0925-8388(97)00516-1

Chromium oxide
dielectric properties of Li^+-exchanged mixed Fe–Cr oxide pillared phosphate 281
electrical conductivity of chromia-pillared α-zirconium phosphate 287
Condensed clusters
new reduced molybdenum tellurides $(Rb,Cs)_{n-2}Mo_{3n}Te_{3n+2}$ ($n = 4, 5, 6, 8$) containing condensed Mo_{3n} clusters 305
Copper-intercalation
synthesis and characterization of copper intercalated $ZrTe_3$ 97
Cr–Re–C system
rhenium solid solution in the Cr–Re–C ternary system at solidus temperature 402
Cr-diluted layered oxides
mutual influence of '3d' and '4f' atoms in K_2NiF_4-type structure diluted solid solutions $Y_{1-x}Nd(Ce)_xCaCr_yAl_{1-y}O_4$ ($x \leq 0.1$; $y \leq 0.1$) 428
Crystal field
magnetic properties and crystal field effects in $T1LnX_2$ compounds (X = S, Se, Te) 316
Crystal growth
superconducting and structural properties of rare-earth-based Chevrel-phase selenides $REMo_6Se_8$: first single crystal studies 406
Crystal structure
superconducting and structural properties of rare-earth-based Chevrel-phase selenides $REMo_6Se_8$: first single crystal studies 406
relationship between the structural and the magnetic properties of $ErMn_{12-x}Fe_x$ compounds 134
peculiarities of the composition and structure of the compounds of the rare-earth–Ni–In systems 341
new phases RCu_5Sn with the $CeCu_6$ structure type 346
crystallochemistry and physical properties of new phases in Rh_2O_3-SrO binary system 267
crystal structure and magnetic properties of the uranium germanide U_5Ge_4 229
crystal structure and properties of the binary uranium telluride U_2Te_5 320
crystal chemistry and magnetic properties of ternary stannides R_2M_2Sn (R = rare earth or uranium, M = Ni, Pd) 114
crystal structures of low-temperature phases (Phase II) of ionic conductors Ag_7TaS_6 and Ag_7NbS_6 39
Crystallochemistry
crystallochemistry and structural study of some nasicon-like phosphates 49
Cu(I)-Cu(I) pairs
XAFS investigation of Cu(I) local environment in two types of glasses of base composition $LaMgB_5O_{10}$ and $LiLaP_4O_{12}$ 433
Cu(I)-containing glasses
XAFS investigation of Cu(I) local environment in two types of glasses of base composition $LaMgB_5O_{10}$ and $LiLaP_4O_{12}$ 433
Cuprous oxide
optical properties of copper-doped silica gels 438

Degenerate semiconductor
electrical properties of layered copper oxyselenides (BiO) $Cu_{1-x}Se$ and $(Bi_{1-x}Sr_x)OCuSe$ 175
Dense Kondo behavior
synthesis and dense kondo behavior of cubic $AuBe_5$-type $YbCu_5$ compound–systematic change of physical properties in the $YbCu_{5-x}Ag_x (0 \leq x \leq 1)$ system 118
Density of electron states
influence of transition metals on magnetic properties of GdT_2X_2 248
Desintercalation
in situ pulsed laser deposited thin films of ternary molybdenum cluster sulfides $Cu_xMo_6S_8$ ($2 \leq x \leq 4$) 54
Dielectric
dielectric properties of Li^+-exchanged mixed Fe–Cr oxide pillared phosphate 281
Diffusion couple
nitridation of Ti/Nb alloys and solid-state properties of δ-(Ti,Nb)N 521
Directional crystallization
directional crystallization of $MoSi_2$ and some compositions based on it 243
Doped materials
new superconducting materials based upon doping of the Chevrel-phase binary compound Mo_6Se_8 331

EPMA
nitridation of Ti/Nb alloys and solid-state properties of δ-(Ti,Nb)N 521
ESR
complex δ-dependence of electrical and magnetic properties of $La_2NiO_{4+\delta}$ 147
EXAFS
XAFS investigation of Cu(I) local environment in two types of glasses of base composition $LaMgB_5O_{10}$ and $LiLaP_4O_{12}$ 433
local structural and magnetic properties of YFe_2D_x compounds ($0 < x \leq 3.5$) 45
Electr on spin resonance
influence of transition metals on magnetic properties of GdT_2X_2 248
Electric conductivity
effect of Na-deficiency on the spin-Peierls transition in α'-NaV_2O_5 180
Electrical conductivity
synthesis and characterization of copper intercalated $ZrTe_3$ 97
electrical conductivity of chromia-pillared α-zirconium phosphate 287
Electrical conductivity of transition metal compounds (72.80 G)
field- and anisotropy-induced states in $MnAs_{1-x}P_x$-single crystals 502
Electrical properties
controlled reduction and oxidation of $La_{0.85}Sr_{0.15}MnO_3$ single crystals 163
crystal structure and properties of the binary uranium telluride U_2Te_5 320
Electrical resistance
synthesis, thermodynamics and electrical properties of non-stoichiometric $Ba_2CuO_{3+\delta}$ 498
synthesis and electrical properties of solid solutions $BaNb_{1-x}Ti_xO_3$ with $0 < x < 0.8$ 454
Electrical resistivity
electrical properties of layered copper oxyselenides (BiO) $Cu_{1-x}Se$ and $(Bi_{1-x}Sr_x)OCuSe$ 175
a unique metallic system $Ce_3Pt_{23}Ge_{11}$ 211
magnetic and electrical resistivity of RT_2X_2,RTX_2 and RTX intermetallic compounds 253
new phases RCu_5Sn with the $CeCu_6$ structure type 346
solid solutions $ZrNi_{1-x}M_xSn$ (M = Cr, Mn, Cu) and their electrical and magnetic properties 476
Electrical transition
$La_{1-x}MnO_{3-\delta}$ thin films grown by a new liquid source CVD process 157

Electrical
crystallochemistry and physical properties of new phases in Rh_2O_3-SrO binary system 267
Electrode material
lithium electrochemical intercalation in β-$VOSO_4$ 34
Electron densities
electronic structure of AFe_2P_2, A = Ca,Sr,Ba[1] 516
Electron transitions
localized-itinerant electronic transitions in oxides and sulfides 1
Electronic structure
electronic structure of AFe_2P_2, A = Ca,Sr,Ba[1] 516
electronic and magnetic structure of ternary transition metal arsenides related to the Fe_2X type (X = P, As) 65
properties on request in semi-Heusler phases 101
electronic structure of sub-stoichiometric titanium carbides, nitrides and carbonitrides: comparison of TB-LMTO calculations and valence XPS spectra 397
π electrons
copper hydroxide based organic/inorganic ferromagnets 423
3d electrons
copper hydroxide based organic/inorganic ferromagnets 423
Epitaxial thin-film
$La_{1-x}MnO_{3-\delta}$ thin films grown by a new liquid source CVD process 157
Eu^{3+}–O^{2-} associates
evidence of Eu^{3+}-O^{2-} associates by luminescence study of some silicates and aluminosilicates 450
Eu-doped silicates
evidence of Eu^{3+}-O^{2-} associates by luminescence study of some silicates and aluminosilicates 450
Exchange interactions
hydrogen insertion effects on the structural and the magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R = rare-earth metals) 194
Exciton
temperature dependent study of the band edge excitons of ReS_2 and $ReSe_2$ 92

Fe–Cu–Nb–Si–B ribbons
structural properties of amorphous and nanocrystallized Fe–Cu–Nb–Si–B and Fe–Gd–Cu–Nb–Si–B ribbons 381
^{57}Fe Mo
magnetic properties and ^{57}Fe Mössbauer effect in the $U_2Fe_{17-x}Ge_x$ system 481
Ferromagnetic alloys
relationship between the structural and the magnetic properties of $ErMn_{12-x}Fe_x$ compounds 134
hydrogen insertion effects on the structural and the magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R = rare-earth metals) 194
Ferromagnetic materials
magnetic properties of $Ce_2Fe_{17}H_x$ hydrides under hydrostatic pressure 202
Fiber glasses
scandium fluorides 296
Fluorides;
scandium fluorides 296

Gd addition
structural properties of amorphous and nanocrystallized Fe–Cu–Nb–Si–B and Fe–Gd–Cu–Nb–Si–B ribbons 381
Giant magnetoresistance
$La_{1-x}MnO_{3-\delta}$ thin films grown by a new liquid source CVD process 157
Green intense emission
synthesis and long-period phosphorescence of $ZnGa_2O_4$:Mn^{2+} spinel 60

Hafnium carbide
interactions in iron-based cermet systems 486
Half metallic ferromagnet
properties on request in semi-Heusler phases 101
Hall coefficient
electrical properties of layered copper oxyselenides (BiO)$Cu_{1-x}Se$ and $(Bi_{1-x}Sr_x)OCuSe$ 175
Hall effect
intrinsic properties of NiSi 235
Hard magnetic materials
magnetic properties of $(Y_{1-x}Th_x)_2Fe_{14}B$ 467
Heat capacity
a unique metallic system $Ce_3Pt_{23}Ge_{11}$ 211
High oxidation states
high oxygen pressures and the stabilization of the highest oxidation states of transition elements 191
High oxygen pressures
high oxygen pressures and the stabilization of the highest oxidation states of transition elements 191
High pressure measurements
magneto-elastic properties of $MnFeP_{1-x}As_x$ ($0.15 \leq x \leq 0.66$) and $MnRhP_{1-x}As_x$ isostructural series of compounds 508
High temperature Kelvin probe
effect of oxygen potential change on the surface potential of YSR, ZrO_2–Y^2O_3 185
High-T_c superconductivity
quaternary borocarbides: the new and exciting magnetic superconductors 22
$HoNi_2B_2C$
superconductivity and magnetism in the Ho–Ni–B–C system 462
Hopping conduction
magnetism and electron transport phenomena of manganese oxide ion exchanger with tunnel structure 443
Hydride
local structural and magnetic properties of YFe_2D_x compounds ($0 < x \leq 3.5$) 45
Hydrides
RNiAl hydrides and their magnetic properties 206
Hydrogen insertion
magnetic properties of $Ce_2Fe_{17}H_x$ hydrides under hydrostatic pressure 202
Hydrozincite
morphological evolution of zinc oxide originating from zinc hydroxide carbonate 292

Indium
peculiarities of the composition and structure of the compounds of the rare-earth–Ni–In systems 341
Intercalation
in situ pulsed laser deposited thin films of ternary molybdenum cluster sulfides $Cu_xMo_6S_8$ ($2 \leq x \leq 4$) 54
Intermetallic Raman spectroscopy
synthesis, crystal structure, physical properties and Raman spectroscopy of transition metal phospho-silicides MSi_xP_y (M = Fe,Co, Ru, Rh, Pd, Os, Ir, Pt) 71
Intermetallic compound
peculiarities of the composition and structure of the compounds of the rare-earth–Ni–In systems 341
neutron powder diffraction study of the antiferromagnetic compound $Tb_2Pd_{2.05}Sn_{0.95}$ 219

Intermetallic compounds
ferromagnetism of the chimney-ladder compound $Cr_{11}Ge_{19}$ 363
effect of aluminium on phase stability in the $Gd_3Co_{11}(B,Al)_4$ system 356
Intermetallic crystal structure
synthesis, crystal structure, physical properties and Raman spectroscopy of transition metal phospho-silicides MSi_xP_y (M = Fe, Co, Ru, Rh, Pd, Os, Ir, Pt) 71
Intermetallics
quasicrystals and related structures in Al–Ni–Co 350
Interplay
quaternary borocarbides: the new and exciting magnetic superconductors 22
Ionic conductors
crystal structures of low-temperature phases (Phase II) of ionic conductors Ag_7TaS_6 and Ag_7NbS_6 39
Ir(VI) oxides
high oxygen pressures and the stabilization of the highest oxidation states of transition elements 191
Iron oxide
dielectric properties of Li^+-exchanged mixed Fe–Cr oxide pillared phosphate 281
Itinerant magnetism
properties on request in semi-Heusler phases 101

Jahn–Teller effect
structural phase diagram of $La_{1-x}Sr_xMnO_3$ for low Sr doping 152

Kondo systems
transport properties of $(U_{1-x}Np_x)Ru_2Si_2$ alloys 124

$La_2NiO_{4+\delta}$
complex δ-dependence of electrical and magnetic properties of $La_2NiO_{4+\delta}$ 147
Lacunar lanthanum manganites
$La_{1-x}MnO_{3-\delta}$ thin films grown by a new liquid source CVD process 157
Lanthanum manganites
controlled reduction and oxidation of $La_{0.85}Sr_{0.15}MnO_3$ single crystals 163
Laser ablation
in situ pulsed laser deposited thin films of ternary molybdenum cluster sulfides $Cu_xMo_6S_8$ $(2 \le x \le 4)$ 54
Lattice deformation
magnetic properties and crystal field effects in $T1LnX_2$ compounds (X = S, Se, Te) 316
Lattice parameter
nitridation of Ti/Nb alloys and solid-state properties of δ-(Ti,Nb)N 521
Lattice parameters
rhenium solid solution in the Cr–Re–C ternary system at solidus temperature 402
Layer growth
nitridation of Ti/Nb alloys and solid-state properties of δ-(Ti,Nb)N 521
multiphase reaction diffusion in transition metal-boron systems 390
Layered structure
a novel two-dimensional mercury antimony telluride: low temperature synthesis and characterization of $RbHgSbTe_3$ 28
Layered-transition metal dichalcogenide
microwave absorption of mixed-layer transition metal dichalcogenides 325
Lithium exchanged
dielectric properties of Li^+-exchanged mixed Fe–Cr oxide pillared phosphate 281
Lithium intercalation
lithium electrochemical intercalation in β-$VOSO_4$ 34
Localized to itinerant
localized-itinerant electronic transitions in oxides and sulfides 1
Long-period phosphorescence
synthesis and long-period phosphorescence of $ZnGa_2O_4$:Mn^{2+} spinel 60
Long-range crystallographic order
influence of thermal treatment on the phase properties of $HoNi_2B_2C$ 459
Low-dimensional compounds
synthesis and characterization of copper intercalated $ZrTe_3$ 97
Luminescence
XAFS investigation of Cu(I) local environment in two types of glasses of base composition $LaMgB_5O_{10}$ and $LiLaP_4O_{12}$ 433
evidence of Eu^{3+}-O^{2-} associates by luminescence study of some silicates and aluminosilicates 450

Magnetic transition
$La_{1-x}MnO_{3-\delta}$ thin films grown by a new liquid source CVD process 157
Magnet materials
hydrogen insertion effects on the structural and the magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R = rare-earth metals) 194
Magnetic anisotropy (75.30 G)
field- and anisotropy-induced states in $MnAs_{1-x}P_x$-single crystals 502
Magnetic anisotropy
magnetic properties of $(Y_{1-x}Th_x)_2Fe_{14}B$ 467
Magnetic couplings
relationship between the structural and the magnetic properties of $ErMn_{12-x}Fe_x$ compounds 134
Magnetic hydrides
hydrogen insertion effects on the structural and the magnetic properties of the $RFe_{10.5}Mo_{1.5}$ compounds (R = rare-earth metals) 194
Magnetic materials
controlled reduction and oxidation of $La_{0.85}Sr_{0.15}MnO_3$ single crystals 163
Magnetic phase diagram
magnetic properties of the $UCo_{1-x}Ni_xAl$ system 471
Magnetic phase transitions (75.30 K)
field- and anisotropy-induced states in $MnAs_{1-x}P_x$-single crystals 502
Magnetic phase transitions
magneto-elastic properties of $MnFeP_{1-x}As_x$ $(0.15 \le x \le 0.66)$ and $MnRhP_{1-x}As_x$ isostructural series of compounds 508
Magnetic properties
influence of transition metals on magnetic properties of GdT_2X_2 248
crystallochemistry and physical properties of new phases in Rh_2O_3-SrO binary system 267
crystal structure and magnetic properties of the uranium germanide U_5Ge_4 229
crystal structure and properties of the binary uranium telluride U_2Te_5 320
crystal chemistry and magnetic properties of ternary stannides R_2M_2Sn (R = rare earth or uranium, M = Ni, Pd) 114

Magnetic semiconductor
synthesis, crystal structure, physical properties and Raman spectroscopy of transition metal phospho-silicides MSi_xP_y (M = Fe, Co, Ru, Rh, Pd, Os, Ir, Pt) 71
Magnetic structure
electronic and magnetic structure of ternary transition metal arsenides related to the Fe_2X type (X = P, As) 65
neutron powder diffraction study of the antiferromagnetic compound $Tb_2Pd_{2.05}Sn_{0.95}$ 219
magnetic structures of $HoRh_{2-x}Ru_xSi_2$ compounds 225
structure and magnetic ordering in $CeNi_xSn_2$ compounds 335
Magnetic structures
magneto-elastic properties of $MnFeP_{1-x}As_x$ ($0.15 \leq x \leq 0.66$) and $MnRhP_{1-x}As_x$ isostructural series of compounds 508
antiferromagnetic ordering in the novel Dy_3Ge_4 and $DyGe_{1.3}$ compounds studied by neutron diffraction and magnetic measurements 492
Magnetic superconductors
superconducting and structural properties of rare-earth-based Chevrel-phase selenides $REMo_6Se_8$: first single crystal studies 406
new superconducting materials based upon doping of the Chevrel-phase binary compound Mo_6Se_8 331
Magnetic susceptibility
effect of Na-deficiency on the spin-Peierls transition in α'-NaV_2O_5 180
a unique metallic system $Ce_3Pt_{23}Ge_{11}$ 211
new phases RCu_5Sn with the $CeCu_6$ structure type 346
complex δ-dependence of electrical and magnetic properties of $La_2NiO_{4+\delta}$ 147
mutual influence of '3d' and '4f' atoms in K_2NiF_4-type structure diluted solid solutions $Y_{1-x}Nd(Ce)_xCaCr_yAl_{1-y}O_4$ ($x \leq 0.1$; $y \leq 0.1$) 428
solid solutions $ZrNi_{1-x}M_xSn$ (M = Cr, Mn, Cu) and their electrical and magnetic properties 476
Magnetisation measurements
magneto-elastic properties of $MnFeP_{1-x}As_x$ ($0.15 \leq x \leq 0.66$) and $MnRhP_{1-x}As_x$ isostructural series of compounds 508
Magnetisation
relationship between the structural and the magnetic properties of $ErMn_{12-x}Fe_x$ compounds 134
Magnetism
quaternary borocarbides: the new and exciting magnetic superconductors 22
superconductivity and magnetism in the Ho–Ni–B–C system 462
local structural and magnetic properties of YFe_2D_x compounds ($0 < x \leq 3.5$) 45
ferromagnetism of the chimney-ladder compound $Cr_{11}Ge_{19}$ 363
Manganese oxides
magnetism and electron transport phenomena of manganese oxide ion exchanger with tunnel structure 443
Manganese-activated phosphor
synthesis and long-period phosphorescence of $ZnGa_2O_4:Mn^{2+}$ spinel 60
Melt spinning
structural properties of amorphous and nanocrystallized Fe–Cu–Nb–Si–B and Fe–Gd–Cu–Nb–Si–B ribbons 381
Mercury antimony telluride
a novel two-dimensional mercury antimony telluride: low temperature synthesis and characterization of $RbHgSbTe_3$ 28
Metal clustering
XAFS studies of local atomic structure of niobium tellurides 81
Metal phosphide
synthesis, crystal structure, physical properties and Raman spectroscopy of transition metal phospho-silicides MSi_xP_y (M = Fe, Co, Ru, Rh, Pd, Os, Ir, Pt) 71
Metal silicide
synthesis, crystal structure, physical properties and Raman spectroscopy of transition metal phospho-silicides MSi_xP_y (M = Fe, Co, Ru, Rh, Pd, Os, Ir, Pt) 71
Metallic copper
optical properties of copper-doped silica gels 438
Metallization contacts
the ternary compound $Fe_3Ga_{2-x}As_x$: a promising candidate for epitaxial and thermodynamically stable contacts on GaAs 416
Metamagnetic transitions
angular dependence of metamagnetic transitions in RNi_2B_2C (R = Er, Ho, Dy, and Tb) 169
Metamagnetism
magnetic properties of the $UCo_{1-x}Ni_xAl$ system 471
Metastable phases (64.60 M)
field- and anisotropy-induced states in $MnAs_{1-x}P_x$-single crystals 502
Mic rohardness
nitridation of Ti/Nb alloys and solid-state properties of δ-(Ti,Nb)N 521
Microcrystallites
solvothermal synthesis of microcrystallites of transition metal oxides 271
Microstructure
nitridation of Ti/Nb alloys and solid-state properties of δ-(Ti,Nb)N 521
Microwave
Yttrium iron garnet and Y, Fe binary oxides synthesized by microwave monomode energy transfer 275
Microwave absorption
microwave absorption of mixed-layer transition metal dichalcogenides 325
Mixed valence
magnetism and electron transport phenomena of manganese oxide ion exchanger with tunnel structure 443
Mixed-layer structure
microwave absorption of mixed-layer transition metal dichalcogenides 325
Mo
crystal and magnetic properties of GdTSn compounds (T = Ag, Au) 108
structural properties of amorphous and nanocrystallized Fe–Cu–Nb–Si–B and Fe–Gd–Cu–Nb–Si–B ribbons 381
local structural and magnetic properties of YFe_2D_x compounds ($0 < x \leq 3.5$) 45
on the possible existence of unusual higher oxidation states of iron in the Na–Fe–O system 78
MoO_2
solvothermal synthesis of microcrystallites of transition metal oxides 271
Molecular magnetism
copper hydroxide based organic/inorganic ferromagnets 423
Molten salt synthesis
an original way to prepare nitride-type compounds from sulfide precursors 410
Molybdenum
new experimental and theoretical studies on condensed

molybdenum chalcogenide cluster compounds 311
new reduced molybdenum tellurides $(Rb,Cs)_{n-2}Mo_{3n}Te_{3n+2}$ ($n = 4, 5, 6, 8$) containing condensed Mo_{3n} clusters 305
Monovalent copper
optical properties of copper-doped silica gels 438
Morphology
morphological evolution of zinc oxide originating from zinc hydroxide carbonate 292

Na-deficiency
effect of Na-deficiency on the spin-Peierls transition in α-NaV_2O_5 180
Nanoparticles
optical properties of copper-doped silica gels 438
Nanostructure
structural properties of amorphous and nanocrystallized Fe–Cu–Nb–Si–B and Fe–Gd–Cu–Nb–Si–B ribbons 381
Nasicon
crystallochemistry and structural study of some nasicon-like phosphates 49
α'-NaV_2O_5
effect of Na-deficiency on the spin-Peierls transition in α'-NaV_2O_5 180
Nd-diluted layered oxides
mutual influence of '3d' and '4f' atoms in K_2NiF_4-type structure diluted solid solutions $Y_{1-x}Nd(Ce)_xCaCr_yAl_{1-y}O_4$ ($x \leq 0.1$; $y \leq 0.1$) 428
Neutron diffraction
antiferromagnetic ordering in the novel Dy_3Ge_4 and $DyGe_{1.3}$ compounds studied by neutron diffraction and magnetic measurements 492
structure and magnetic ordering in $CeNi_xSn_2$ compounds 335
Neutron diffraction measurements
electronic and magnetic structure of ternary transition metal arsenides related to the Fe_2X type (X = P, As) 65
Neutron powder diffraction
neutron powder diffraction study of the antiferromagnetic compound $Tb_2Pd_{2.05}Sn_{0.95}$ 219
New materials
new superconducting materials based upon doping of the Chevrel-phase binary compound Mo_6Se_8 331
NiSi
intrinsic properties of NiSi 235
Nickel
the Sc–Ni system 258
peculiarities of the composition and structure of the compounds of the rare-earth–Ni–In systems 341
Niobium tellurides
XAFS studies of local atomic structure of niobium tellurides 81
Niobium
mixed valent niobium nitrides and oxynitrides resulting from ammonolysis of alkaline niobates 512
Nitride
mixed valent niobium nitrides and oxynitrides resulting from ammonolysis of alkaline niobates 512
an original way to prepare nitride-type compounds from sulfide precursors 410
Non-stoichiometric spinel
synthesis and long-period phosphorescence of $ZnGa_2O_4$:Mn^{2+} spinel 60
Non-stoichiometry
synthesis, thermodynamics and electrical properties of non-stoichiometric $Ba_2CuO_{3+\delta}$ 498
controlled reduction and oxidation of $La_{0.85}Sr_{0.15}MnO_3$ single crystals 163

Optical properties
RuSi: metal-semiconductor transition by change of structure 238
Organic/inorganic materials
copper hydroxide based organic/inorganic ferromagnets 423
Outgasing behaviour
interactions in iron-based cermet systems 486
Oxygen potential
effect of oxygen potential change on the surface potential of YSR, ZrO_2–Y^2O_3 185
Oxynitride
mixed valent niobium nitrides and oxynitrides resulting from ammonolysis of alkaline niobates 512

Pack-boriding
multiphase reaction diffusion in transition metal-boron systems 390
Perovskite compounds
structural phase diagram of $La_{1-x}Sr_xMnO_3$ for low Sr doping 152
Perovskites
localized-itinerant electronic transitions in oxides and sulfides 1
Phase equilibria
the Sc–Ni system 258
a representation of the Sm–Co–Zr–Cu–Fe quinary system: a tool for optimisation of 2/17 permanent magnets 129
thermodynamic evaluation of phase equilibria in the quasibinary TiNi–TiRu system 263
Phase diagram
synthesis and dense kondo behavior of cubic $AuBe_5$-type $YbCu_5$ compound ù systematic change of physical properties in the $YbCu_{5-x}Ag_x(0 \leq x \leq 1)$ system 118
Phase properties
influence of thermal treatment on the phase properties of $HoNi_2B_2C$ 459
Phase transition
electrical properties of layered copper oxyselenides (BiO)$Cu_{1-x}Se$ and $(Bi_{1-x}Sr_x)OCuSe$ 175
Phase transitions
localized-itinerant electronic transitions in oxides and sulfides 1
Phosphate
crystallochemistry and structural study of some nasicon-like phosphates 49
XAFS investigation of Cu(I) local environment in two types of glasses of base composition $LaMgB_5O_{10}$ and $LiLaP_4O_{12}$ 433
Photoemission
valence instabilities and inhomogeneous mixed valence in some ternary europium compounds 87
Piezoreflectance
temperature dependent study of the band edge excitons of ReS_2 and $ReSe_2$ 92
Pillared
dielectric properties of Li^+-exchanged mixed Fe–Cr oxide pillared phosphate 281
electrical conductivity of chromia-pillared α-zirconium phosphate 287
Powder method
new phases RCu_5Sn with the $CeCu_6$ structure type 346
Preferential occupation
effect of aluminium on phase stability in the $Gd_3Co11(B,Al)_4$ system 356
Pressure effects
magnetic properties of $Ce_2Fe_{17}H_x$ hydrides under hydrostatic pressure 202

Quasibinary section
thermodynamic evaluation of phase equilibria in the quasibinary TiNi–TiRu system 263
Quasicrystals
quasicrystals and related structures in Al–Ni–Co 350
Quaternary
quaternary borocarbides: the new and exciting magnetic superconductors 22

Rare earth
crystal chemistry and magnetic properties of ternary stannides R_2M_2Sn (R = rare earth or uranium, M = Ni, Pd) 114
Rare-earth
peculiarities of the composition and structure of the compounds of the rare-earth–Ni–In systems 341
Rare earth intermetallic compounds
influence of transition metals on magnetic properties of GdT_2X_2 248
Rare earth intermetallics
magnetic and electrical resistivity of RT_2X_2,RTX_2 and RTX intermetallic compounds 253
Rare-earth intermetallics
magnetic structures of $HoRh_{2-x}Ru_xSi_2$ compounds 225
magnetic properties of $(Y_{1-x}Th_x)_2Fe_{14}B$ 467
Rare-earth germanides
antiferromagnetic ordering in the novel Dy_3Ge_4 and $DyGe_{1.3}$ compounds studied by neutron diffraction and magnetic measurements 492
Rare earth oxyhalides
X-ray powder diffraction study of the stability of solid solutions in $LaO(Cl_{1-x}Br_x)$ 299
Rare earths
*R*NiAl hydrides and their magnetic properties 206
structure and magnetic ordering in $CeNi_xSn_2$ compounds 335
Re-entrant behaviour
influence of thermal treatment on the phase properties of $HoNi_2B_2C$ 459
Reaction diffusion
multiphase reaction diffusion in transition metal-boron systems 390
Reactions
interactions in iron-based cermet systems 486
Resistivity
complex δ-dependence of electrical and magnetic properties of $9La_2NiO_{4+\delta}$ 147
intrinsic properties of NiSi 235
influence of transition metals on magnetic properties of GdT_2X_2 248
transport properties of $(U_{1-x}Np_x)Ru_2Si_2$ alloys 124
Rhodium–strontium–oxygen system
crystallochemistry and physical properties of new phases in Rh_2O_3-SrO binary system 267
Rietveld analysis
X-ray powder diffraction study of the stability of solid solutions in $LaO(Cl_{1-x}Br_x)$ 299
Rietveld refinement
effect of aluminium on phase stability in the $Gd_3Co_{11}(B,Al)_4$ system 356
RuSi
RuSi: metal-semiconductor transition by change of structure 238

Scandium
the Sc–Ni system 258
scandium fluorides 296
Selenium
new experimental and theoretical studies on condensed molybdenum chalcogenide cluster compounds 311
Semiconductor-metal cross-over
properties on request in semi-Heusler phases 101
Semiconductor
solid solutions $ZrNi_{1-x}M_xSn$ (M = Cr, Mn, Cu) and their electrical and magnetic properties 476
Si microelectronics
intrinsic properties of NiSi 235
Silicides
directional crystallization of $MoSi_2$ and some compositions based on it 243
Sintering
interactions in iron-based cermet systems 486
Sm_2Co_{17} type magnets
a representation of the Sm–Co–Zr–Cu–Fe quinary system: a tool for optimisation of 2/17 permanent magnets 129
Sm–Co–Zr–Cu–Fe system
a representation of the Sm–Co–Zr–Cu–Fe quinary system: a tool for optimisation of 2/17 permanent magnets 129
Sodium ferrate
on the possible existence of unusual higher oxidation states of iron in the Na–Fe–O system 78
Sol-gel
optical properties of copper-doped silica gels 438
Solid solutions $Ba(Nb,Ti)O_3$
synthesis and electrical properties of solid solutions $BaNb_{1-x}Ti_xO_3$ with $0 < x < 0.8$ 454
Solid solutions
X-ray powder diffraction study of the stability of solid solutions in $LaO(Cl_{1-x}Br_x)$ 299
solid solutions $ZrNi_{1-x}M_xSn$ (M = Cr, Mn, Cu) and their electrical and magnetic properties 476
Solid state phase equilibria
the ternary compound $Fe_3Ga_{2-x}As_x$: a promising candidate for epitaxial and thermodynamically stable contacts on GaAs 416
Solid–liquid equilibria
a representation of the Sm–Co–Zr–Cu–Fe quinary system: a tool for optimisation of 2/17 permanent magnets 129
Solubility
rhenium solid solution in the Cr–Re–C ternary system at solidus temperature 402
Solvothermal reaction
a novel two-dimensional mercury antimony telluride: low temperature synthesis and characterization of $RbHgSbTe_3$ 28
Solvothermal synthesis
solvothermal synthesis of microcrystallites of transition metal oxides 271
Specific heat
intrinsic properties of NiSi 235
Spin-Peierls transition
effect of Na-deficiency on the spin-Peierls transition in α'-NaV_2O_5 180
Stannides
solid solutions $ZrNi_{1-x}M_xSn$ (M = Cr, Mn, Cu) and their electrical and magnetic properties 476
crystal chemistry and magnetic properties of ternary stannides R_2M_2Sn (R = rare earth or uranium, M = Ni, Pd) 114
Stripe order
complex δ-dependence of electrical and magnetic properties of $La_2NiO_{4+\delta}$ 147
Structural analysis
effect of aluminium on phase stability in the $Gd_3Co_{11}(B,Al)_4$ system 356
Structural phase transition

RuSi: metal-semiconductor transition by change of structure 238
Structural transition
superconducting and structural properties of rare-earth-based Chevrel-phase selenides $REMo_6Se_8$: first single crystal studies 406
Structural transition
new superconducting materials based upon doping of the Chevrel-phase binary compound Mo_6Se_8 331
Structural transitions
structural phase diagram of $La_{1-x}Sr_xMnO_3$ for low Sr doping 152
Structure calculations
mutual influence of '3d' and '4f' atoms in K_2NiF_4-type structure diluted solid solutions $Y_{1-x}Nd(Ce)_xCaCr_yAl_{1-y}O_4$ ($x \leq 0.1$; $y \leq 0.1$) 428
Structure–property relation
microwave absorption of mixed-layer transition metal dichalcogenides 325
Structure
crystallochemistry and structural study of some nasicon-like phosphates 49
local structural and magnetic properties of YFe_2D_x compounds ($0 < x \leq 3.5$) 45
Sub-stoichiometric compounds
electronic structure of sub-stoichiometric titanium carbides, nitrides and carbonitrides: comparison of TB-LMTO calculations and valence XPS spectra 397
Sulfide
an original way to prepare nitride-type compounds from sulfide precursors 410
Sulfides
localized-itinerant electronic transitions in oxides and sulfides 1
Superconductivity
superconductivity and magnetism in the Ho–Ni–B–C system 462
nitridation of Ti/Nb alloys and solid-state properties of δ-(Ti,Nb)N 521
influence of thermal treatment on the phase properties of $HoNi_2B_2C$ 459
valence instabilities and inhomogeneous mixed valence in some ternary europium compounds 87
Susceptibility
magnetic properties of the $UCo_{1-x}Ni_xAl$ system 471
Synthesis of β-$VOSO_4$
lithium electrochemical intercalation in β-$VOSO_4$ 34
Synthesis
yttrium iron garnet and Y, Fe binary oxides synthesized by microwave monomode energy transfer 275
System
the Sc–Ni system 258

TB-LMTO calculations
electronic structure of sub-stoichiometric titanium carbides, nitrides and carbonitrides: comparison of TB-LMTO calculations and valence XPS spectra 397
Tellurides
new reduced molybdenum tellurides $(Rb,Cs)_{n-2}Mo_{3n}Te_{3n+2}$ ($n = 4, 5, 6, 8$) containing condensed Mo_{3n} clusters 305
3d ternary arsenides
electronic and magnetic structure of ternary transition metal arsenides related to the Fe_2X type (X = P, As) 65
Ternary lanthanide chalcogenides
magnetic properties and crystal field effects in T_1LnX_2 compounds (X = S, Se, Te) 316
Ternary phosphides
electronic structure of AFe_2P_2, A = Ca,Sr,Ba[1] 516
$ThCr_2Si_2$ structure
electronic structure of AFe_2P_2, A = Ca,Sr,Ba[1] 516
Thermal expansion
magnetic properties of $(Y_{1-x}Th_x)_2Fe_{14}B$ 467
Thermodynamic model
thermodynamic evaluation of phase equilibria in the quasibinary TiNi–TiRu system 263
Thermoelectric power
magnetism and electron transport phenomena of manganese oxide ion exchanger with tunnel structure 443
Thermogravimetric analysis
controlled reduction and oxidation of $La_{0.85}Sr_{0.15}MnO_3$ single crystals 163
Thermopower
new phases RCu_5Sn with the $CeCu_6$ structure type 346
solid solutions $ZrNi_{1-x}M_xSn$ (M = Cr, Mn, Cu) and their electrical and magnetic properties 476
Thin film
in situ pulsed laser deposited thin films of ternary molybdenum cluster sulfides $Cu_xMo_6S_8$ ($2 \leq x \leq 4$) 54
Thin-film
the ternary compound $Fe_3Ga_{2-x}As_x$: a promising candidate for epitaxial and thermodynamically stable contacts on GaAs 416
Thin-film synthesis
$La_{1-x}MnO_{3-\delta}$ thin films grown by a new liquid source CVD process 157
TiC_xN_y
electronic structure of sub-stoichiometric titanium carbides, nitrides and carbonitrides: comparison of TB-LMTO calculations and valence XPS spectra 397
Titanium carbonitride
interactions in iron-based cermet systems 486
Transition metal borides
multiphase reaction diffusion in transition metal-boron systems 390
Transition metals
an original way to prepare nitride-type compounds from sulfide precursors 410
Transition-metal dichalcogenides
temperature dependent study of the band edge excitons of ReS_2 and $ReSe_2$ 92
Tunnel structure
magnetism and electron transport phenomena of manganese oxide ion exchanger with tunnel structure 443
Two-dimensional systems
copper hydroxide based organic/inorganic ferromagnets 423

$U_{1-x}Np_xRu_2Si_2$
transport properties of $(U_{1-x}Np_x)Ru_2Si_2$ alloys 124
$UCo_{1-x}Ni_xAl$
magnetic properties of the $UCo_{1-x}Ni_xAl$ system 471
Uranium germanides
Crystal structure and magnetic properties of the uranium germanide U_5Ge_4 229
Uranium telluride
Crystal structure and properties of the binary uranium telluride U_2Te_5 320
Uranium
crystal chemistry and magnetic properties of ternary stannides R_2M_2Sn (R = rare earth or uranium, M = Ni, Pd) 114

VO^{2+} structural unit
lithium electrochemical intercalation in β-$VOSO_4$ 34

Valence XPS
electronic structure of sub-stoichiometric titanium carbides, nitrides and carbonitrides: comparison of TB-LMTO calculations and valence XPS spectra 397
Valence fluctuations
valence instabilities and inhomogeneous mixed valence in some ternary europium compounds 87

Weak ferromagnetism
magnetism and electron transport phenomena of manganese oxide ion exchanger with tunnel structure 443
Work function
effect of oxygen potential change on the surface potential of YSR, ZrO_2–Y^2O_3 185

X-Ray diffraction
effect of aluminium on phase stability in the $Gd_3Co_{11}(B,Al)_4$ system 356
X-ray diffraction
the ternary compound $Fe_3Ga_{2-x}As_x$: a promising candidate for epitaxial and thermodynamically stable contacts on GaAs 416
X-ray powder diffraction
X-ray powder diffraction study of the stability of solid solutions in $LaO(Cl_{1-x}Br_x)$ 299
XAFS
XAFS studies of local atomic structure of niobium tellurides 81
XANES spectra
synthesis and characterization of copper intercalated $ZrTe_3$ 97
XANES
XAFS investigation of Cu(I) local environment in two types of glasses of base composition $LaMgB_5O_{10}$ and $LiLaP_4O_{12}$ 433

YFe_2O_4
yttrium iron garnet and Y, Fe binary oxides synthesized by microwave monomode energy transfer 275

$YbCu_5$
synthesis and dense kondo behavior of cubic $AuBe_5$-type $YbCu_5$ compound — systematic change of physical properties in the $YbCu_{5-x}Ag_x(0 \le x \le 1)$ system 118
$YbCu_{5-x}Ag_x$
synthesis and dense kondo behavior of cubic $AuBe_5$-type $YbCu_5$ compound — systematic change of physical properties in the $YbCu_{5-x}Ag_x(0 \le x \le 1)$ system 118
Yttria stabilized zirconia
effect of oxygen potential change on the surface potential of YSR, ZrO_2–Y^2O_3 185
Yttrium iron garnet
yttrium iron garnet and Y, Fe binary oxides synthesized by microwave monomode energy transfer 275

Zinc gallates
synthesis and long-period phosphorescence of $ZnGa_2O_4$:Mn^{2+} spinel 60
Zinc hydroxide carbonate
morphological evolution of zinc oxide originating from zinc hydroxide carbonate 292
Zinc oxide
morphological evolution of zinc oxide originating from zinc hydroxide carbonate 292
Zirconium carbonitride
interactions in iron-based cermet systems 486
Zirconium phosphate
dielectric properties of Li^+-exchanged mixed Fe–Cr oxide pillared phosphate 281
electrical conductivity of chromia-pillared α-zirconium phosphate 287
Zirconium telluride
synthesis and characterization of copper intercalated $ZrTe_3$ 97

van Hove scenario
valence instabilities and inhomogeneous mixed valence in some ternary europium compounds 87
